

# Aula do dia 21/06/21

①  $\widehat{AB} = 2x$

$\widehat{DAB} = 66^\circ 15'$  sendo ângulo de segmento

$\widehat{DAB} = \frac{\widehat{AB}}{2}$ , logo:

$66^\circ 15' = \frac{2x}{2}$

$x = 66^\circ 15'$

R: Alt (E)

②  $\widehat{u} = \frac{\widehat{EF}}{2}$

u é o ângulo exterior externo da circunferência menor

$\widehat{u} = \frac{40^\circ}{2}$

$\widehat{u} = 20^\circ$

$\widehat{u} = \frac{\widehat{CD} - \widehat{AB}}{2}$

$\frac{\widehat{CD} - \widehat{AB}}{2} = 20^\circ$

$\widehat{CD} - 40^\circ = 20^\circ \cdot 2$

$\widehat{CD} = 40^\circ + 40^\circ$

$\widehat{CD} = 80^\circ$

R: Alt (E)

$\frac{\widehat{CD} - 40^\circ}{2} = 20^\circ$

③ a soma dos ângulos internos do triângulo  $\triangle ACE = 180^\circ$

$\widehat{u} + 50^\circ + \widehat{x} = 180^\circ$

$\widehat{u} + 50^\circ + 35^\circ = 180^\circ$

$\widehat{u} = 95^\circ$

R: (A)

$$\textcircled{4} \quad 2\alpha + 2\beta = 360^\circ \quad \alpha + \beta = 180^\circ$$

$$\frac{2\alpha + 2\beta = 360^\circ}{2} \quad \frac{2\alpha + 2\beta = 360^\circ}{2}$$

$$2\pi \text{ rad} = 360^\circ$$

$$\pi \text{ rad} = 180^\circ$$

R: C

$$\textcircled{5} \quad \text{Ângulo externo } \hat{C} = y + y = 2y$$

$$\overline{EF} = 4y \quad (\text{Vale o dobro})$$

$$\hat{X} = \overline{EF}$$

$$x = 4y$$

$$\frac{x}{4} = y$$

$\hat{X}$  ângulo central

$$R: y = \frac{x}{4}$$

$$\textcircled{6} \quad \hat{E} + 45^\circ + 60^\circ = 180^\circ$$

$$\hat{E} = 180^\circ - 45^\circ - 60^\circ$$

$$\hat{E} = 75^\circ$$

$\hat{X}$  também tem  $\overline{AC}$  como arco

$$x = \frac{150^\circ}{2} = 75^\circ$$

$\overline{AC}$  vale o dobro do ângulo  $\hat{E}$

$$\overline{AC} = 2 \cdot 75^\circ$$

$$\overline{AC} = 150^\circ$$

O arco  $\overline{AC} = 150^\circ$ , o arco  $\overline{CA}$  é a parte da circunferência que completa  $360^\circ$

$$\overline{CA} = 360^\circ - \overline{AC}$$

$$\overline{CA} = 360^\circ - 150^\circ$$

$$\overline{CA} = 210^\circ$$

$$y = \frac{\overline{CA}}{2} = \frac{210^\circ}{2} = 105^\circ$$

$$R: x = 75^\circ \text{ e } y = 105^\circ$$
